

**Parkland School District
Continuous Energy Improvement (CEI) Scope
Kernsville Elementary
June 1, 2017-May 31, 2018**

The Parkland School District (PSD) in Allentown, Pennsylvania has been provided an opportunity to work in conjunction with PPL electric Utilities and CLEAResult to participate in a Continuous Energy Improvement (CEI) Program. Designed to possibly save PSD as much as 5% to 15% of the district's annual electrical energy usage and piloted at Orefield Middle School, Kernsville Elementary (KV) will be utilizing similar procedures and methodologies to support the new "Parkland Culture" of energy conservation. We have set our program goal at 2 % for this year of the program.

To achieve our goal, we will be relying on the PSD Energy Team, our own KV Green Team, and CLEAResult's experience and recommendations for improving our energy efficiency. Our focus at KV will not only be to decrease our energy usage here at school, but to also educate students and their families of energy saving habits and practices they may try at home to conserve energy. We will strive to change and improve our behavioral culture increasing staff and student awareness. We will track and analyze available data for KV electrical consumption to ascertain the effect of our changed behaviors on electrical usage.

Communication is an important component of our ongoing success. We will willingly hold and attend Green Team meetings and engage in presentations and discussions with our staff. We value keeping staff, students, and cohorts updated and informed of Kernsville's decisions, progress, and successes with our CEI effort.
