

The science fair committee is in need of one or two people to shadow this event this year and take over the Science and Invention Fair next year.

Your responsibilities would include: to organize and oversee the typing and submitting the application packet, organizing the applications, plotting the location of each display, communicating with Mr. Bartman and Mr. McKenna, typing the program and setting up, monitoring and clean up on the day of the event. Most of this can be done at home when you have free time.

If you have any questions or are interested in chairing or co-chairing the science and invention fair committee next year please call Michele Allsop at 610-391-8824. or email me at allsopm@parklandsd.org
