

# STUDY ISLAND

## Using Study Island from Home

Since the Study Island state assessment program is completely web-based, students can access it from any computer with an Internet connection and a standard web browser (Internet Explorer or Netscape). Results from students study sessions are recorded and made available to the teachers. This includes results from sessions completed at home.

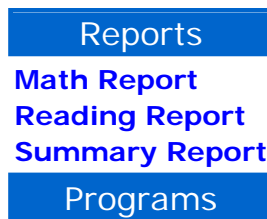

The program is divided into sections based on subject (math and reading). Each section contains approximately 25 to 30 topics. Each topic contains a bank of questions with explanations. All topics are accompanied by a lesson, which includes some brief information about the material covered by the questions in the topics. It is helpful to view the lesson before answering the questions on the topic.

## Follow the instructions below, in order to use the program:

1. Go to [www.studyisland.com](http://www.studyisland.com)
2. Enter your username and password at the upper-left of the screen, and click "login".  
**Note:** Students will receive a username and password from their Information Technology teacher at school.
3. Click on the section tab (math or reading) that you wish to work on.
4. **You must complete 10 questions in the pretest before moving on to the topics within the section.**
5. Once you complete the "Pretest," you may work through the remainder of the topics assigned by your teacher.
6. Read any class notes and additional information from your teacher before proceeding.
7. To **pass** a topic, you must satisfy the topic's passing requirements which are based on a minimum number of questions answered (usually 10) and a minimum percentage correct (around 70%). A **blue ribbon** icon is displayed next to all passed topics.
8. You will receive a **red triangle** next to a topic that you need additional help in. In some cases, you will be given access to a remedial topic.
9. Ribbons are awarded based on a student's cumulative score for the topic.
10. Unanswered questions in a topic are disregarded. Students can end a session at any time by clicking DONE without a negative affect to their scores. They can return to that topic to complete the session, picking up where they left off.
11. You can go back at anytime and retake any areas you had difficulty with or see your teacher for additional help.

## **To access the Reports:**

1. After your child has logged in, select a subject from the left-hand side of the screen to access the reports. (see the screen shot below)
2. Here you will find a variety of reports with information such as how much time your child has spent on math or reading, and what questions they missed. You will also be able to compare you child with other children in their class and in the state that are using Study Island. You can select reports by Subject or select the Summary option to get both Math and Reading.

(The links under “Reports” above are a screen shot and are not active links.  
These links will be active when you log onto “Study Island”)
